The Pro versions include the X12 seasonal adjustment procedure plus additional data capabilities, including reading data via SQL/ODBC, reading CRSP and FRED databases, and (on Windows) exchanging data with FAME databases (requires FAME software—see www.fame.com).

Additional copy prices apply when purchasing more than one copy of RATS at a time. Please call for a quote on cluster and network licenses, or large volume purchases.

Student Discounts

- Check here if you are a full-time student.**

Full-time students are eligible for a \$200 discount on the price of one new RATS license, and a \$50 discount on one copy of CATS. To qualify for the discount, you **must include verification of your status as a full-time student**, such as a letter from a faculty member on university letterhead, a copy of a current tuition statement, or a current registration receipt.

The discounts can only be applied to the purchase of a single new license for RATS and/or CATS **for the student's own personal use**. They do not apply for updates or additional copies. Please include the student discount amount in the "Total Payment Price" section on the reverse side of this form.
